

**"ALMIRALIFT: Leading the Way in Premium Customized Global Elevator Solutions with a Wide Range of Innovative New Products".**

**ALMIRALIFT ELEVATOR SYSTEMS distinguishes itself through its comprehensive in-house manufacturing, extensive international experience, and flexible, client-focused approach. In addition Complete Elevator Packages, we offer tailored elevator solutions for challenging spaces, supported by detailed, project-specific designs and rigorous quality control. Our strong partnerships with global factories enhance our ability to integrate renowned components and adapt to diverse regional requirements. This combination of innovation, customization, and international expertise makes us a standout choice for clients seeking reliable and adaptable elevator systems. The features distinguish us are:**

**Unlike many European and American companies that rely on external sources for their materials and production; mainly in Chinese factories, ALMIRALIFT ELEVATOR SYSTEMS is unique in that aspect. It manufactures its products entirely in-house. All materials are produced at its exclusive factory in Turkey, allowing for rigorous quality control before loading and dispatching.**

**ALMIRALIFT ELEVATOR SYSTEMS is not restricted to standard dimensions. We can manufacture traction elevators for very tight spaces, including minimal pit depths (150mm), low headroom (2525mm), and small shafts. In contrast, many large Chinese, European, and American companies are limited to producing only standard-sized lifts and often reject projects with non-standard dimensions..**

**The technical department at ALMIRALIFT ELEVATOR SYSTEMS approaches each project uniquely. A detailed design is created for every project, and material placements are planned according to this design before production begins. This method enables our designers to thoroughly assess the entire system's functionality prior to starting**

**production, allowing any potential issues to be resolved in advance. In contrast, European and Chinese manufacturers generally do not follow such an individualized, project-specific design process.**

**In addition to our elevator products, we also manufacture steel structures for lifts that can be easily assembled using screws and nuts, eliminating the need for welding.**

**In addition to our three-phase systems, we offer 220V single-phase systems that are ideal for regions experiencing frequent power outages. We also support our controllers and lifts with a specially designed system called 'GREEN MOTION,' which provides sufficient electrical power during outages to allow the lifts to perform up to 200 start-stop cycles.**

**Our product range is extensive and diverse. We don't just produce passenger traction lifts; we also manufacture:**

- Cargo lifts, both hydraulic and traction, with capacities up to 10,000 kg**
- Car lifts, available in both traction and hydraulic systems, with capacities up to 10,000 kg**
- Dumbwaiters**
- Home lifts**
- Platforms**
- Automatic, semi-automatic, and manual doors**
- Guillotine bi-parting vertical opening dumbwaiter doors**
- Easily-installed steel structures for elevators**
- Car turntable platforms**
- 220V single-phase elevator systems**
- Disabled lifts**
- Circular lifts with circular steel structures**
- Panoramic mushroom-type lifts**
- Hospital bed lifts**
- Refurbishment Electrical Package (Controller, LOPs, COP, Machine)**
- Modernization Mechanical Package (Car slings, Doors, Brackets, etc...)**
- Stairlift, Chairlift, Wheelchair Platforms (With Subcontractors)**

**Our online technical support, both mechanical and electrical, is available during working hours on weekdays.**

**Electrical online support is also available during weekend working hours in multiple languages, including English, French, Spanish, Turkish, and Russian.**

**All material specifications and exact dimensions of the product will be provided to clients before installation. Unlike other companies, additionally, we provide 3D renderings of all materials used in each project, along with detailed drawings, to assist installers during the process. This serves as a comprehensive 3D installation guide.**

**Regarding internal design, we are not restricted to specific models. We offer a wide variety of models for clients to choose from, and if they have a particular design in mind, they can simply send us a photo. We will then create a custom model based on their preferences. In the near future, we will enable clients to design their preferred cabin interiors directly on our website and submit their designs for production.**

**At least once a year, representatives from ALMIRALIFT FACTORY visit the countries and companies we collaborate with to inspect installed projects on-site and gather feedback from various regions for product improvement.**

**If any mistakes occur during installation, such as missing, incorrect, or non-functional parts, we will promptly replace the part via air cargo.**

**Business partners are always welcome to visit our factory to observe the quality of materials, the production process, and the design procedures, gaining a comprehensive understanding of our capabilities.**

**We specialize in manufacturing lifts for tight and narrow spaces between staircases, allowing residents in older buildings to benefit from having a lift. This capability has been a key feature of ours, enabling many historic residential areas in European countries to take advantage of our solutions since the factory's inception.**

**We provide clients with preliminary technical drawings before finalizing any orders or processing payments. This ensures that all details are reviewed and agreed upon in advance, allowing for any necessary adjustments and confirming that the project meets the client's requirements.**

**Our team is consistently available for video calls in urgent situations to address and clarify any uncertainties. We prioritize swift and effective communication to ensure that all concerns are resolved promptly and that any ambiguities are thoroughly explained.**

**In addition to our Turkish-manufactured products, we have the capability to integrate a wide range of renowned European products into our solutions. For instance, upon request, we can incorporate high-quality Italian or German doors and machines into our systems. This level of customization and flexibility sets us apart, as many European companies are unable to offer such tailored solutions. By offering these options, we ensure that our clients have access to a broader selection of premium components, enhancing the overall quality and functionality of our products.**

**With extensive international experience gained from working across Eastern and Central European countries, Ukraine, Russia, and other nations within the former Soviet Union, as well as significant exposure in the Arabic region, including the UAE (Dubai, Abu Dhabi, Sharjah, Al Ain), Iraq, Oman, and various African countries, we have developed a deep understanding of the special requirements in different regions. This broad experience has enabled us to ensure that our materials meet international standards and are compliant with EU-type certificates, making them widely acceptable across diverse markets.**

**In addition to producing our own materials, our longstanding and close cooperation with partner factories allows us to develop, refine, and design collaborative products using our combined expertise and experience. This strong partnership enables us to address a wide range of project requirements without rejecting any opportunity. By leveraging our joint knowledge, we can customize solutions to meet specific needs and ensure that every project is completed to the highest standard.**

**Having huge Project with huge companies like Samsung Engineering in Hungary, Or Big Hotel Projects in Croatia, Ukraine, Czech Republic, Nigeria, and working with bih holding companies in middle east along with competitive prices has made us a great and best option for big tender Project and large quantity of elevator needed sites.**

**Our experience with large-scale projects, including collaborations with industry giants like Samsung Engineering in Hungary and significant governmental buildings in Croatia, and hotel developers in Ukraine, Russia, the Czech Republic, and Nigeria, positions us as a leading choice for major tender projects. Additionally, our work with prominent holding companies in the Middle East, combined with our competitive pricing, makes us an ideal partner for tender sites requiring a high volume of elevators. This proven track record underscores our capability to deliver on complex, large-scale projects, making us the best option for clients seeking reliability and value in the elevator industry.**

**For refurbishment or modernization projects where clients prefer not to replace every component of their existing lift system, ALMIRALIFT ELEVATOR SYSTEM provides an array of customized solutions. We understand that each client's requirements are unique, and as such, we offer a range of both electrical and mechanical packages that can be tailored to address specific needs. Whether the goal is to upgrade functionality, improve safety, or enhance the overall performance of the lift, our flexible offerings ensure that clients receive precisely what they need without unnecessary replacements. Our approach combines technical expertise with a deep commitment to customer satisfaction, ensuring that the modernization process is both efficient and cost-effective, while also extending the lifespan of the existing lift system.**

**ALMIRALIF is your global partner in new lift industry!**
